

XM radio is a service I pay for. They are offering me a great service when they give me traffic & weather. This is a service that I can not get anywhere else. I travel to Michigan a couple of times a month. When leaving Michigan, for a couple of hour drive, I turn on the weather to hear what is happening in Chicago. When an hour out, I turn on traffic to tell me which way to go. There is no other station that can service those needs.

Leave free enterprise alone! Let these people continue to provide a service to me and others like me. If their product ever sours, I will stop paying the bill and they will hear my vote (in cash) loud and clear!

Reject NAB's petition 04-160.
